

# IDROPATCH®

**HYDRO REACTIVE  
COLD ASPHALT**

**FOR DEFINITIVE  
PROFESSIONAL  
REPAIRS**

Manufactured and marketed by:

**BETON  
ASFALTI**  
CIS - TRENTO

## APPLICATION FIELDS

POTHOLES WITH WATER

SURFACE ABRASIONS

JOINTS

RECONSTRUCTION OF COLLARS AROUND MANHOLES AND MANHOLE COVERS

CRACKS

1  
PARKING

Condominium areas, shopping centers

2  
WALKING AREAS

Sidewalk, cycle paths, crossings, gardens

3  
JOINTS

Small repairs, junctions on driveways and private areas

4  
HIGHWAYS

Areas with high and heavy traffic, draining too

5  
OTHERS

Repairs on concrete surfaces, parking areas

## LAYING PROCEDURE

### 1 CLEANING

Remove any detrites and clean the area to be repaired.

### 2 PREPARATION

Pour **IDROPATCH** in the pothole, distribute uniformly with a trowel.

### 3 WETTING THE SURFACE

Pour water over **IDROPATCH** evenly for reaction. Excess water will not damage the material or affect the repair.

### 4 ROTATING

Compact with pestle, vibrating plate or roller. On busy roads, open directly to traffic.

### 5 PASSAGE

Immediate opening to traffic.

AVAILABLE TYPES	0/2 mm	0/3 mm	0/4 mm	0/8 mm
Packaging	25 kg buckets			
Packing	900kg pallet 36 buckets			
Consumption	Approx. 20kg per 1sqm with 1 cm thickness.			
Storage	9 months. Non-stackable pallets, keep under cover.			

**HYDRO-REACTIVE CONGLOMERATE, COLD MIXABLE,  
SOLVENT-FREE, ACCORDING TO RVS 08.97.01**

**TECHNICAL DATA SHEET**

Technical data	UNIT	RESULT	NORMATIVE
Inert			EN13043
Binder content	M%	7,9	EN 12697-1
Marshall stability after 10 days at 25°C water bath	KN	10,2	EN 12697-34
Inert release at -20°C	M%	< 55	EN 12697-17
ITSR: tensile strength after spraying with water at 25°C	%	> 80	EN 12697-12
ITSW: residual tensile strength after spraying with water at 25°C	N/mm <sup>2</sup>	0,8	EN 12697-12
Vacuum content	Vol. %	4,3	EN 12697-8
VOCs	M%	0	EN 14039
